

MI Directivity Pattern

The diagrams below show the horizontal dispersion angle of the **M1** speaker at different frequencies. These plots are generated using lines of equal sound pressure.

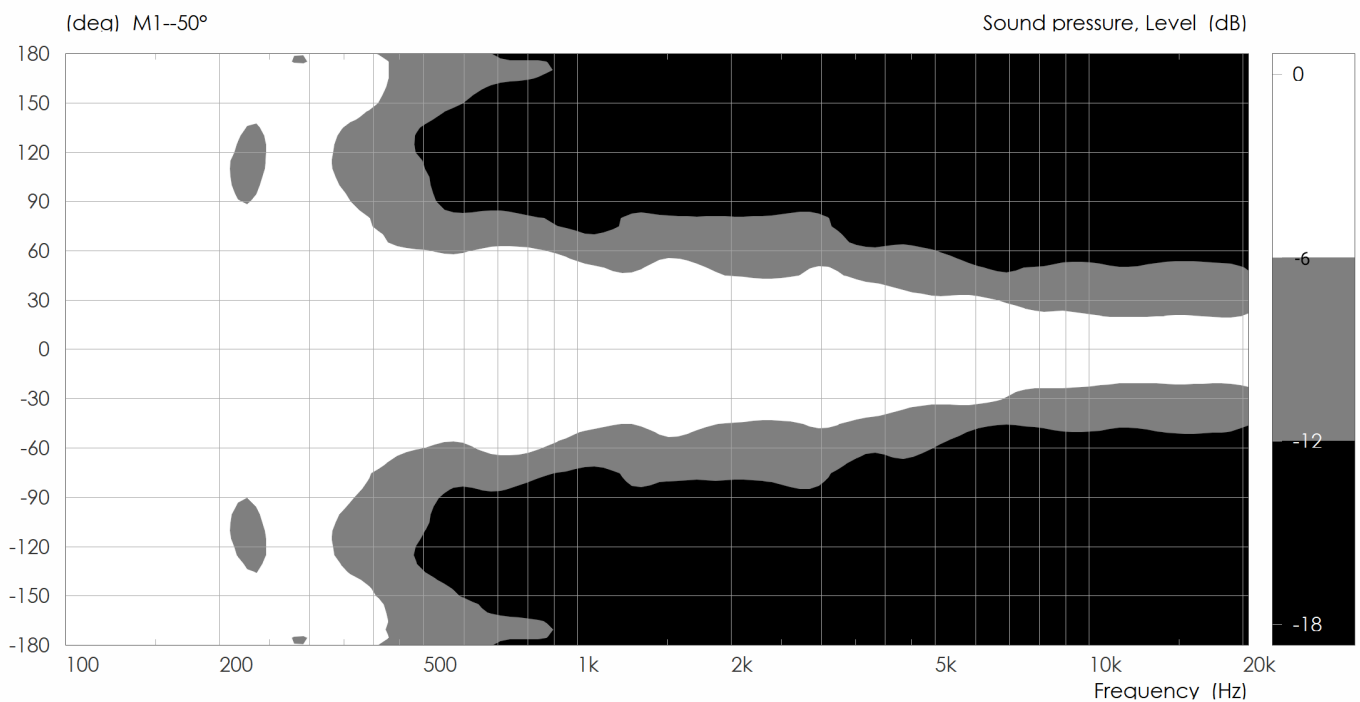

Gray: -6 dB

Black: -12 dB

With the horn set to 80°, as shown below:

With the horn set to 50°, as shown below:

M1 Frequency Response Curve

The chart below shows the frequency response curve of the **M1** speaker.

Frequency Response (-3 dB): 55 Hz – 18 kHz

Maximum SPL (@1 m): 134 dB
