

RA8 Directivity Pattern

The diagrams below show the horizontal dispersion angle of the **RA8** speaker at different frequencies. These plots are generated using lines of equal sound pressure.

Gray: -6 dB

Black: -12 dB

With the horn set to 100°, as shown below:

RA8 Frequency Response Curve

The chart below shows the frequency response curve of the **RA8** speaker.

Frequency Response (-3 dB): 85 Hz – 18 kHz

Maximum SPL (@1 m):

LF : 127 dB

HF : 120 dB
