

V10 Directivity Pattern

The diagrams below show the horizontal dispersion angle of the **V10** speaker at different frequencies. These plots are generated using lines of equal sound pressure.

Gray: -6 dB

Black: -12 dB

With the horn set to 110°, as shown below:

The diagrams below show the Vertical dispersion angle of the **V10** speaker at different frequencies. These plots are generated using lines of equal sound pressure.

Gray: -6 dB

Black: -12 dB

V10 Frequency Response Curve

The chart below shows the frequency response curve of the **V10** speaker.

Frequency Response (-3 dB): 45 Hz – 18 kHz

Maximum SPL (@1 m):

LF : 134 dB

HF : 135 dB
